Costar Video Systems Announces Plans to Unveil The New Cloud-Based Video Management Software StarNET PRO At ISC West 2020

Coppell, Texas – January 24, 2020 – Costar Video Systems, a subsidiary of Costar Technologies, Inc. (OTC Markets Group: CSTI), will deliver live demonstrations of it's latest cloud-managed video management software StarNET PRO from booth 8045 at the upcoming ISC West exhibition and conference. The three-day security industry event will be held at the Sands Expo Center in Las Vegas, NV, March 18-20, 2020.

Costar's StarNET PRO Software is a surveillance solution scalable for small to enterprise business customers. Sporting an intuitive GUI, this suite makes it easy for installers and those unfamiliar with IT networks to easily navigate its rich feature set of powerful recording options.

The StarNET Pro software includes a suite of new integrated software tools that can be used to monitor and control the new cloud management resources. This includes advanced control over the administration of public and private deployments of the software all allowing for greater personalization for the demands of any business.

Providing a general-purpose video recording application, StarNET PRO meets a wide range of surveillance needs. From cameras to recorders to the user interface and beyond, this software delivers on a premium experience. Designed with one-time charge options, the tiered cost structure allows customers to pick and choose the features needed instead of purchasing unnecessary additions.

StarNET Pro is the perfect solution for project-based surveillance roll outs. When the time comes to transform and update a project, this offering will allow Costar Video Systems customers to seamlessly integrate their client's requirements. In addition, utilizing Costar's family of cameras, keyboards, recorders, extended storage products, analytics appliances, and more will help ensure a future-proof surveillance solution.

Born out of Costar's deep understanding of the surveillance market, StarNET PRO is a premier surveillance software solution. It is prepared to meet and excel customer's needs and provides a scalable solution for a wide range of customer applications.
